DETAILED ACTION

Election/Restrictions

1. Claims 1 and 15 are generic to a plurality of disclosed patentably distinct species comprising: the specie shown in Figs. 4-5, the specie shown in Figs. 6-9, the specie shown in Fig. 10 & 12. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. The restriction is deemed proper because the specie shown in Figs. 4-5 comprise a polarizing prism classified in class 359, subclass 496. This area of search would not be required for the other species.
